

src/publictransportationscheduler  
/header/publictransportationscheduler.h

```
graph TD; A["src/publictransportationscheduler  
/header/publictransportationscheduler.h"] --> B["stdint.h"]; A --> C["stdbool.h"]
```

The diagram illustrates a file dependency. A top-level box represents the header file `src/publictransportationscheduler/header/publictransportationscheduler.h`. Two blue arrows originate from the bottom of this box and point to two separate boxes below it, representing the files `stdint.h` and `stdbool.h`. This indicates that the top-level header file includes both of these standard C header files.

stdint.h

stdbool.h
